

Andreas Hipp - Strategy, Start-ups and People evolution

Andreas was the Founder and Group CEO of Epsilon Global Communications, which includes Epsilon service provider and Cataleya technology businesses.

During his 18 years in the global telecoms community he has contributed to the evolution of the international markets and technologies, creating innovative businesses, and disruptive business models. He loves technology but people even more and what technology can or must do for them.

He is now continuing to support the industry's evolution through his start-up accelerator (Incipio) and his position on the board of Cirrus Core Networks, which offers an all NFV-based Infrastructure as a Service (IaaS) proposition for Mobile Network Operators.

Andreas' primary expertise and advisory roles focus on deploying disruptive business propositions and technologies, start-ups and on inspiring innovation in mobile, cloud and data & analytics. He also has a strong background and passion for people, culture and organization behavioral evolutions, which are now crucial to all operators' survival and success.
